

CAPABILITY STATEMENT

Equipment Solutions
Sales | Hire | Service

www.sirusmining.com.au

Established 2011

We understand the mining and heavy industry sector; and not just the big end of town.

We have the mobility and the expertise to not only find the right solution – but build one from scratch if that's what it takes.

WHO WE ARE

Sirus Mining Solutions has withstood the tests of time, economic downturn, and resource price fluctuations.

Sirus' commitment to highest-grade service and a solutions-based client focus means not only has the company survived, but it has diversified, strengthened and grown to the operation it is today.

Under the directorship of Steve Galea, the Sirius Mining Solutions team services the heavy industry and mining sectors – from the top tier down.

WHERE WE ARE

Our expansive premises, with two-street frontage spanning from Lester Hansen Street through to David Muir Street at Slade Point, means we can accommodate machinery and kit of all sizes and scale.

OUR PROJECTS

We can service. We can rebuild. We can start from scratch. With our team of highly experienced and professional engineers, we have you covered – whether it's an urgent breakdown or scheduled maintenance.
